

Where Does Money Come From?

Today we have been talking about jobs and where money comes from to help make the connection between having a job and earning money to buy the things that you might need and want. We have introduced the idea of having a bank account, and explained two key ways to access money in a bank account, namely by using a bank card in store or by withdrawing cash from a cash machine.

Ideas to talk about

- ◆ Have conversations about jobs that you have had since you started work, what you liked and disliked about these jobs and how important the money is that you earned
- ◆ Talk to your child about the different uses of a bank card to access your money - by using a bank card in store or withdrawing cash from a cash machine
- ◆ Help your child understand the different words we use with money
