

St John Vianney Catholic Primary School

Name: Jack Littlewood Age 11 Campaign: Saving Money and Electricity Poster

Brief Explanation of Campaign Materials:

I promoted ways of saving electricity and water, whilst also saving money, in my poster. I used the government website: www.gov.uk for the advice I used in making savings in school energy and water but these can be used at home too. If people follow the advice, it will have a positive impact on climate change by reducing emissions of carbon dioxide from energy use.

My chosen issue:

I chose the issue of saving energy through reductions in electricity and water because I feel passionate about limiting climate change to ensure that there is a world for everybody to enjoy in the future.

Small changes we can make to save money and protect the environment:

Small changes such as: upgrading existing heating systems; maintaining appliances to ensure that they last longer; educating people about the ways they can reduce their use of energy; turning off lights and electrical items when they are not needed, and ensuring that taps are turned off after use, will help to save money and protect our environment.

If I was to win...

If I won, I would ask my school to install a smart meter that pupils and staff could see so that everyone could witness the effects of turning off appliances and lights. Then, they would know that their efforts were worthwhile. I would spend my own prize voucher on something for my garden or allotment, perhaps bird houses or bird feeders.

Organisation/ School Name:		ST JOHN VIARNEY CATHOLIC PRIMARY SCHOOL	
Team Name (optional)			
Student First Name	Student Last Name	Age	Campaign materials included e.g. saving energy poster, fast fashion article
JACK	LITTLEWOOD	11	1. SAVING MONEY AND ELECTRICITY POSTER
			Additional campaign materials:
			2.
			3.

Briefly explain your campaign material(s) and how they are intended to raise awareness of the issues around saving money and protecting the environment?

I promoted ways of saving electricity and water, whilst also saving money in my poster. I used the government website: www.gov.uk for advice ⁱⁿ making savings in school energy and water but these can be used at home too. If people follow the advice it will have a positive impact on climate change by reducing emissions of carbon dioxide from energy use.

What is your chosen issue? And why did you choose this issue?

I chose the issue of saving energy through reductions in electricity and water because I feel passionate about limiting climate change to ensure that there is a world for everyone to enjoy in the future.

What small changes can you make to save money and protect the environment?

Small changes such as: upgrading heating systems, maintaining appliances to ensure that they last longer, educating people about the ways they can reduce their use of energy, turning off lights and electrical items when they are not needed, and ensuring that ^{these} ~~these~~ are turned off will help to save money and protect the environment.

If your entry was to win the Young Money Challenge, how would you spend your prize voucher in a way that supports responsible consumerism?

If I won, I would ask my school to install a smart meter that pupils and staff could see so that everyone could witness the effects of turning off appliances and lights. Then, they would know that their efforts were worthwhile. I would spend my own prize voucher on something for my garden or allotment, perhaps bird houses or bird feeders.

Turn off appliances when they are not in use.

Turn off lights when they are not needed.

Use systems such as heating properly.

How to Save Money and Electricity

Consider renewable energy.

Teach children about the importance of saving electricity.

Use water efficiently.

Upgrade heating systems to maximise efficiency.

Understand your bills.
